

COSMETIC DERMAL FILLER

Hyaluronic Acid vs. Radiesse: Restore, Refine, and Rejuvenate

Dermal fillers are one of the most versatile, non-surgical aesthetic tools used to restore volume, enhance contours, and soften the visible signs of aging. At Integrative, our doctors offer personalized filler treatments that support your natural beauty using advanced techniques and physician-grade products, including Hyaluronic Acid-based fillers and Radiesse®.

Rather than altering your features, our approach focuses on restoring balance and harmony – subtly enhancing your appearance while supporting the health of your skin and connective tissues.

BENEFITS

- Replenish lost volume in cheeks, lips, under-eyes, and temples
- Smooth deep lines and wrinkles (e.g., nasolabial folds, marionette lines)
- Lift sagging areas without surgery
- Improve facial symmetry and contour definition
- Stimulate collagen and elastin production (Radiesse®)
- Naturally hydrate and plump skin (Hyaluronic Acid)

WHAT TO EXPECT

Your first appointment includes a focused aesthetic consultation to understand your goals, evaluate your facial structure, and determine the most suitable filler type. We'll explore areas of volume loss, skin quality, and tissue movement, and develop a plan that complements your unique facial anatomy.

Treatments are performed using sterile, minimally invasive techniques. Most sessions take 30-60 minutes and include comfort measures like numbing cream. Effects are seen immediately, though results continue to improve in the days following.

TREATMENT COURSE & ANTECIPATED EFFECTS

- Immediate results with natural enhancement
- Minor swelling or bruising may occur and generally resolves within a few days
- Hyaluronic Acid fillers typically last 6-12 months depending on area and product
- Radiesse® often lasts 12-18 months and stimulates collagen production for longer-term results
- Regular maintenance is recommended for sustained outcomes
- Combining with other services (e.g., microneedling, PRF) can further enhance results

SAFETY

Dermal fillers are generally safe when administered by trained, licensed professionals. At Integrative, your treatment will be performed by a Naturopathic Doctor with advanced certification in medical aesthetics.

Common side-effects:

Temporary swelling, bruising, tenderness, or redness.

Rare risks:

Allergic reaction, vascular compromise (vascular occlusion), asymmetry.

You'll receive detailed aftercare instructions to ensure safety and optimal healing. Immediate follow-up is recommended if you experience significant pain, unusual discoloration, or concerns post-treatment.

COST

- Initial Aesthetic Consultation: \$50.00 (applied to same-day treatment)
- Filler Treatments: Priced per syringe; varies by product and area treated – Hyaluronic Acid and Radiesse options available
- Custom treatment plans and combination packages are available.

*Ask your provider or front desk for current pricing and packages.
