

# Vitamin & Mineral Repletion - IV Drip

## What is Vitamin & Mineral Repletion IV?

This drip contains vitamin C, B-vitamins, folic acid, selenium, zinc, potassium, magnesium, calcium and molybdenum in a base of sterile water. Due to the concentrated combination of vitamins and minerals and to maximize absorption in the body, a larger fluid volume of sterile water is used.

This drip is a balanced replenishing formula when used after chelation therapy, to aid detoxification, diminish nutrient depletion, or just to restore and maintain healthy nutritional status.

### Uses

- Detoxification
- Diminish nutrient depletion
- Restore and maintain healthy nutritional status

### Side Effects

#### Common

- Bruising at IV access site
- Fatigue
- Heat & flushing sensation due to the magnesium
