

Migraine - IV Push

What is Migraine IV Push?

This IV is indicated in both prevention of headache & migraine onset and in the treatment of an acute episode. IV therapy delivers rapid hydration and 100% absorption of important nutrients indicated for fast improvement of migraine and headache symptoms.

Magnesium deficiency has been noted in patients suffering from magnesium. Furthermore, stress may increase the excretion of magnesium from the body. Additionally, magnesium is important in regulating neuronal function and cerebral blood flow involved in migraine pathogenesis.

B6 has been shown to reduce the severity and frequency of migraine attacks. Moreover, it is effective in lowering homocysteine levels in migraine patients.

Procaine provides temporary pain relief while also assisting in resetting neuronal membranes.

Gelsemium is a well-known headache homeopathic for pain relief.

Uses

- Cluster, tension, headaches
- Migraines

Ingredients

- Magnesium Sulfate
- B6
- Procaine 2%
